Summary

Fernando Augusto is a full-stack developer with 15+ years of experience, specializing in the Microsoft platform (.NET, C#, SQL Server) and modern web technologies. He has solid expertise in systems for healthcare, education, legal, and retail sectors, with a focus on ERP development, process automation, and data integration.

Technical Skills:

- **Front-end:** JavaScript, jQuery, Bootstrap, HTML/CSS
- **Backend:** Standard (4.8) and LT (8+) asp.NET (WebForms, MVC, Architecture for REST APIs),
- **ORMs:** Entity Framework, Dapper, NHibernate,
- **Data Manipulation and Non-Relational Caching:** Lambda & LINQ Expressions, Redis
- **Relational Databases:** SQL Server, MySQL, Oracle
- **DevOps/Versioning:** Azure DevOps, Github, Git, SVN, TFS
- **Design Standards and Best Practices:** Singleton, Factory, SOLID, DRY

Sector Knowledge:

- TISS/SADT (Brazilian Government/SUS/ANS Pattern)
- Medical Billing Streams
- school management (Gier platform).
- Web Crawling

Differential:

- Experience as a support analyst in Microsoft infrastructure (Exchange, Active Directory).
- Passage as a programming teacher for adults and the elderly.
- Ability to translate complex business rules (e.g. legal, education, healthcare) into technical solutions.
