Summary

Fernando Augusto is a full-stack developer with 15+ years of experience, specializing in the Microsoft platform (.NET, C#, SQL Server) and modern web technologies. He has solid expertise in systems for healthcare, education, legal, and retail sectors, with a focus on ERP development, process automation, and data integration.

Technical Skills:

- **Front-end:** JavaScript, jQuery, Bootstrap, HTML/CSS
- **Backend:** .NET Framework 4.8 and .NET 8+ (LTS): ASP.NET WebForms, MVC and REST APIs (NSwag/OpenAPI)
- **ORMs:** Entity Framework, Dapper, NHibernate
- **Data Manipulation and Non-Relational Caching:** RegEx, Lambda Expressions & LINQ, Redis
- **Relational Databases:** SQL Server, MySQL, Oracle
- **Reports and Official Documents:** RDLC/Reporting Services, XML/XSD, XAdES digital signatures (ICP-Brasil)
- **DevOps/Versioning:** Azure DevOps, GitHub, Git, SVN, TFS, CI/CD (build and release automation), PowerShell
- **Design Patterns and Best Practices:** SOLID, DRY, GoF patterns (Singleton, Factory)
- **AI-Assisted Development:** AI agents (Claude Code) for investigation, code review and documentation, with human validation of results

Sector Knowledge:

- TISS/SADT (Brazilian ANS/SUS Standard)
- Medical Billing Workflows
- School Management (Gier Platform)
- Brazilian Digital Diploma (MEC): issuance, XAdES/ICP-Brasil digital signing and submission of diplomas and academic transcripts compliant with the MEC XSD
- Web Crawling

Differentiators:

- Experience as a support analyst in Microsoft infrastructure (Exchange, Active Directory).
- Former programming teacher for adults and seniors.
- Ability to translate complex business rules (e.g. legal, education, healthcare) into technical solutions.

Education

Technologist in Internet Systems **(SENAC, 4 semesters).**
Complementary courses in **English (Yazigi, intermediate)** and **Xamarin (FIAP).**

Professional Experience

- **SESI-SENAI SP (via Hyti)**
  System Analyst Developer *From 09/2025 to present*
  Outsourced through Hyti, supporting and evolving 3 internal systems at SESI-SENAI-SP (Digital Diploma, SGSET and SAS). Key contributions:
  - Responsible developer for the Digital Diploma System of SESI-SP and SENAI-SP: issuance, ICP-Brasil (XAdES) digital signing and submission of diplomas and academic transcripts compliant with the MEC XSD.
  - Cut Diploma Registry Book issuance time from 3–10 minutes to ~30 seconds by moving report rendering to the data server.
  - 39 production releases and ~180 fix and enhancement deliveries (09/2025–10/2026), running the development → staging → production cycle on an automated build and release pipeline.
  - Diagnosed production incidents rooted in legacy data, performed traceable bulk data remediation and delivered access-control security fixes.
  - Research- and spec-driven development with AI agents (Claude Code): each task's investigation log becomes the spec executed in isolated git worktrees, with human validation before merge.
- **Eicon**
  System Analyst Developer *From 08/2022 to 12/2024*
  Support and innovation of the Gier platform (municipal public school management), focusing on web/mobile solutions that connect families, students and teachers.
- **AASP – Associação de Advogados de São Paulo (via Sysmap)**
  System Developer *From 12/2021 to 07/2022*
  Worked in outsourcing through Sysmap, focusing on the development and maintenance of solutions for crawling/robots, as well as supporting tools aimed at legal back-office.
- **HC-FMUSP - Fundação Faculdade de Medicina da USP/Hospital das Clínicas (via JHealth)**
  System Developer *From 04/2021 to 12/2021*
  Worked in outsourcing by JHealth. Support, development, and maintenance of systems for the operation and care of SUS patients at the Hospital das Clínicas da USP (HC-FMUSP).
- **Versatilis System**
  System Analyst Developer *From 09/2015 to 08/2020*
  Development and maintenance of ERP platform in asp.NET Web Forms for clinics and aesthetic studios. Manages medical records, appointments, and exams, serving small offices and large franchises.
- **Interação Comércio e Automação de Eventos**
  System Developer *From 05/2015 to 09/2015*
  Development and maintenance of integrated solutions for visitor, conference attendee, and press accreditation, exhibitor registration and control, big data analysis and marketing, as well as back-end in large-scale events.
- **SC Serviços**
  System Developer *From 02/2014 to 05/2014*
  Development and maintenance of internal applications in asp.NET, adaptation of the legacy system interface in asp.NET 3.5 Web Forms for new browsers, development, and architecture of Windows Services for internal CRM routines.
- **Prefeitura do Município de São Paulo – Secretaria Municipal de Educação**
  Information and Communication Technologies Intern *From 07/2013 to 11/2013*
  Implementation of internal communication solutions for the board via corporate chat (Spark/Open Fire), maintenance of the regional directorate's institutional portal in SharePoint, creation of organization and storage standards for the web resources of the institutional portal.
- **Marketdata**
  asp.NET Development Intern *From 11/2011 to 07/2012*
  Development of dynamic Hotsites for re-registration, ranking consultation, and incentive campaigns for Natura and Boticário, Back-end, web services consumption, SQL Server 2008 database modeling, and asp.NET Web Forms applications.
- **B2U Sistemas**
  Support Analyst; asp.NET Development Intern *From 02/2011 to 11/2011*
  Analysis, support, and development of Web system on the .NET 2.0 platform, manipulation and maintenance of SQL Server 2005/2008 Express, remote/on-site system installation and approval.
